全球現僅存約3,200隻老虎，如果我們不立即採取拯救行動，老虎可能於下一個虎年絕跡！

老虎在貓科動物中體形最大，對維持生態平衡極為重要。但自上一個世紀，野生老虎的數目，由約十萬隻銳減至現今只剩約三千二百隻。足跡曾全遍亞洲的老虎，已絕跡於爪哇、峇里島和中國大部分地區。老虎現正面臨絕種的危機，這說法毫不誇張。過去五十年，已有三個老虎品種絕種了，而其餘六種都被列為瀕危或極度瀕危。

支持世界自然基金會，一同拯救老虎

老虎雖然面臨巨大的威脅，我們仍有一線機會拯救牠們。經世界自然基金會的努力，東北虎（西伯利亞虎）已從瀕臨絕種的邊緣被拉回來，牠們的數目由低至只有四十隻上升至超過五百隻。

現在全球只有三千二百隻野生老虎，世界自然基金會期望能於2022年，即下一個虎年，令野生老虎的數目增加一倍。沒有你的幫助，我們絕不能達成此目標。你的捐款將用於中國的老虎保育工作。

請即捐款支持，確保我們將來仍能目睹老虎！

Tiger numbers are as low as 3,200 and they may become extinct by the next Year of the Tiger if we do not take action NOW!

The tiger is the largest member of the cat family. It plays a vital role in the maintenance of a healthy ecosystem. In the past 100 years, the number of tigers in the wild has collapsed from around 100,000 to about 3,200. These magnificent cats once roamed all of Asia, but have now disappeared from Java, Bali and almost all of China and are in serious danger of becoming extinct. This is no exaggeration. Three sub-species of tiger have already been wiped out over the last 50 years. The remaining six sub-species are classified as endangered or critically endangered.

Support WWF to save the tigers

There is still time to save the world's tigers. WWF has helped to save the Amur tiger (Siberian tiger), which stood on the verge of extinction. WWF's support has helped transform its diminishing population of just 40, to over 500. It can be done without interfering with human development.

With only 3,200 tigers left in the wild, WWF's goal is to double the population by 2022, the next Year of the Tiger. We want children to know what wild tigers are and we need your help to ensure there are still tigers in a vital natural habitat. Please join us. Your donation will support WWF's tiger conservation work in China.

Please make your donation to ensure future generations can marvel at tigers!
